

ABSTRACT

'SCREW-OFF TOP EXTRACTOR' refers to the present extractor as a piece manufactured with disposable and low cost materials, to be placed on bottle-necks of screw-on beverages bottles, with screw threads on the bottle neck; this extractor has internal slits (02) to incase in the external slits of the tops and facilitate the unscrewing of the top of the beverage bottle. The present extractor internal wall is made from top to bottom in a conical form (03) permitting a sure fitting on the bottle neck.
